PHRM4102 Viva Rubric (2026)

10 mins planning, 5 mins presentation, 10 mins questions. 25% weight.

Date: _____ **| Examiner:** _____ **| Student:** _____

	Exceptional	Advanced	Functional	Developing	Minimal
Identification of MRPs (PEx)	All major, moderate, and minor MRPs correctly identified and classified; justification for prioritisation is precise and logical, focusing on the most clinically significant factors affecting patient outcomes	All major and most moderate and minor MRPs correctly identified and classified; justification for prioritisation demonstrates breadth and depth, with clinical reasoning clearly explained across all classifications	All major MRPs and some moderate and minor MRPs correctly identified and classified; justification for prioritisation is accurate but lacks depth of reasoning	Major MRPs identified but classification contains errors that could compromise patient safety; justification for prioritisation lacks depth or accuracy	Major MRPs missed or incorrectly identified, placing the patient at risk; justification absent or does not demonstrate understanding of MRP identification and prioritisation
	50 points	**37.5 points**	**25 points**	**12.5 points**	**0 points**
Resolution of MRPs (PEx)	Treatment options identified and evaluated for all MRPs; justification for final choice is precise and logical; management plan is feasible and coherent with the preceding identification and prioritisation; contingency options identified for major MRPs	Treatment options identified and evaluated for all MRPs; justification for final choice demonstrates breadth and depth; management plan is feasible and coherent with the preceding identification and prioritisation	Treatment options identified for all major MRPs; justification for final choice is accurate but lacks depth of reasoning; management plan is consistent with the preceding identification and prioritisation with some consideration of feasibility	Treatment options incomplete or clinically inappropriate for one or more major MRPs, which could compromise patient safety; justification lacks depth or accuracy; management plan inconsistent with preceding identification and prioritisation	No clinically appropriate treatment options identified; justification absent or does not demonstrate understanding of treatment options; management plan absent or inappropriate
	50 points	**37.5 points**	**25 points**	**12.5 points**	**0 points**
Patient-centred Care (PEx)	Patient-specific factors precisely and discerningly integrated throughout the management plan; the most significant factors are identified and shape clinical decision-making	Patient-specific factors integrated with depth and coherence throughout the management plan, influencing clinical decision-making	Patient-specific factors integrated into the management plan with some depth; integration is present but not consistent across all decisions	Patient-specific factors acknowledged but poorly integrated, resulting in decisions that are inappropriate for this patient	No integration of patient-specific factors; management plan does not reflect a patient-centred approach
	25 points	**18.75 points**	**12.5 points**	**6.25 points**	**0 points**
Notes					

PHRM4102 Viva Rubric (2026)

	Exceptional	Advanced	Functional	Developing	Minimal
Roles and Responsibilities (L&M)	Pharmacist's scope of practice clearly demonstrated, including appropriate identification of referral requirements; all relevant health professionals identified with precise and logical allocation of responsibilities; coherent detail provided on how health professionals will work together for this patient	Pharmacist's scope of practice demonstrated with depth, including identification of referral requirements; relevant health professionals identified with accurate allocation of responsibilities; some detail on how health professionals will work together	Pharmacist's scope of practice demonstrated with accuracy; relevant health professionals identified with accurate but incomplete allocation of responsibilities; limited detail on interprofessional collaboration	Pharmacist's scope of practice inconsistent or contains errors in role allocation that could result in care outside scope of practice; health professionals identified but responsibilities inaccurately allocated	Pharmacist's scope of practice misunderstood or misrepresented; no meaningful allocation of responsibilities to health professionals
	25 points	**18.75 points**	**12.5 points**	**6.25 points**	**0 points**
Communication C&C)	Clinical reasoning communicated with clarity, conciseness and logical precision throughout; thought process for resolving complexity and ambiguity is explicitly and coherently articulated; professional language used accurately and consistently	Clinical reasoning communicated clearly and logically with depth; thought process is explicitly articulated with breadth across all MRPs and management decisions; professional language used accurately	Clinical reasoning communicated clearly with accurate use of professional language; thought process is articulated but lacks depth	Communication lacks clarity or logical structure, interfering with understanding of the clinical reasoning; thought process is difficult to follow; professional language used inconsistently	Communication is incoherent or inappropriate; clinical reasoning absent or cannot be followed; professional language absent or used incorrectly
	50 points	**37.5 points**	**25 points**	**12.5 points**	**0 points**
Response to Questions (PEx)	Responds accurately to questions across all topics; responses demonstrate depth of reasoning beyond standard reference texts, including consideration of alternative options, interdisciplinary implications, and flow-on effects	Responds accurately to questions across all topics; responses demonstrate depth of reasoning with clear clinical rationale	Responds accurately to most questions; reasoning is present but lacks depth; responses are generally consistent with standard reference texts	Responses contain clinical errors that could compromise patient safety; reasoning is limited or difficult to follow across most questions	Unable to respond meaningfully to questions; responses absent or demonstrate fundamental misunderstanding of clinical content
	50 points	**37.5 points**	**25 points**	**12.5 points**	**0 points**
